VALLEDOLMO PARADISE 2030: LIVING THE TRANSITION

NEW KIDS ON THE BLOCK

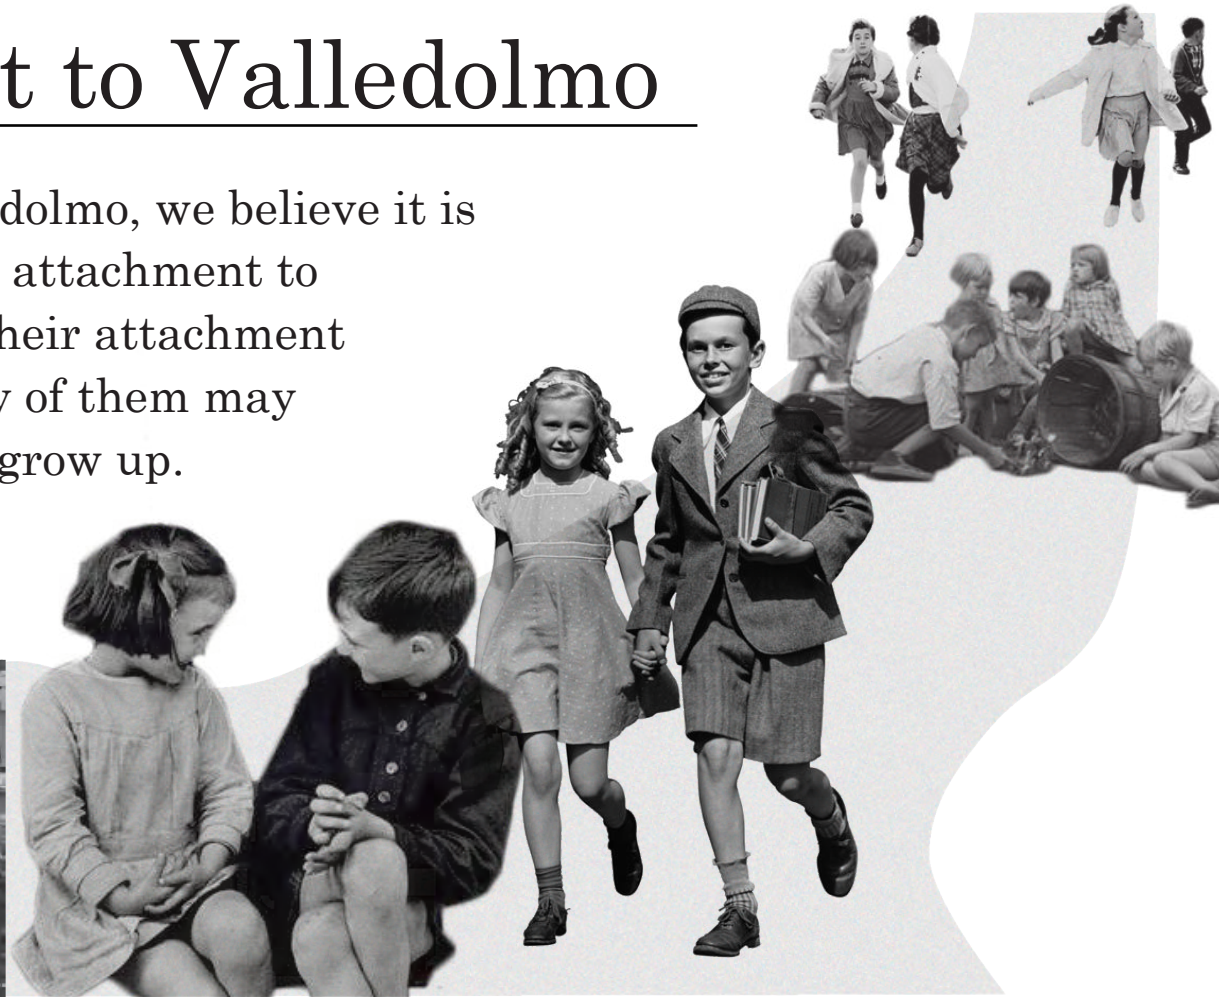

UNIVERSITY OF KYUSHU (JAPAN), DEPARTMENT OF ARCHITECTURE. NEW KIDS ON THE BLOCK: Scientific committee: Prof. Divigalottiya Prasanna (Kyushu University), Tutor: Prof. Jaehoon Chung, Mrs. Aki Nakamitsu, Students: Akihiro Edayoshi, Kei Tomoguchi, Shuji Kumamaru, Yue Zhang

PROBLEM

1. Teenager attachment to Valledolmo

To relief the depopulation situation in Valledolmo, we believe it is important for many teenagers to develop an attachment to Valledolmo from a young age. In this way, their attachment will be passed on to their children and many of them may would like to stay in Valledolmo when they grow up.

CONCEPT

2. Bond with Valledolmo

3. Relationship between oldhands and newcomers

MATERIAL

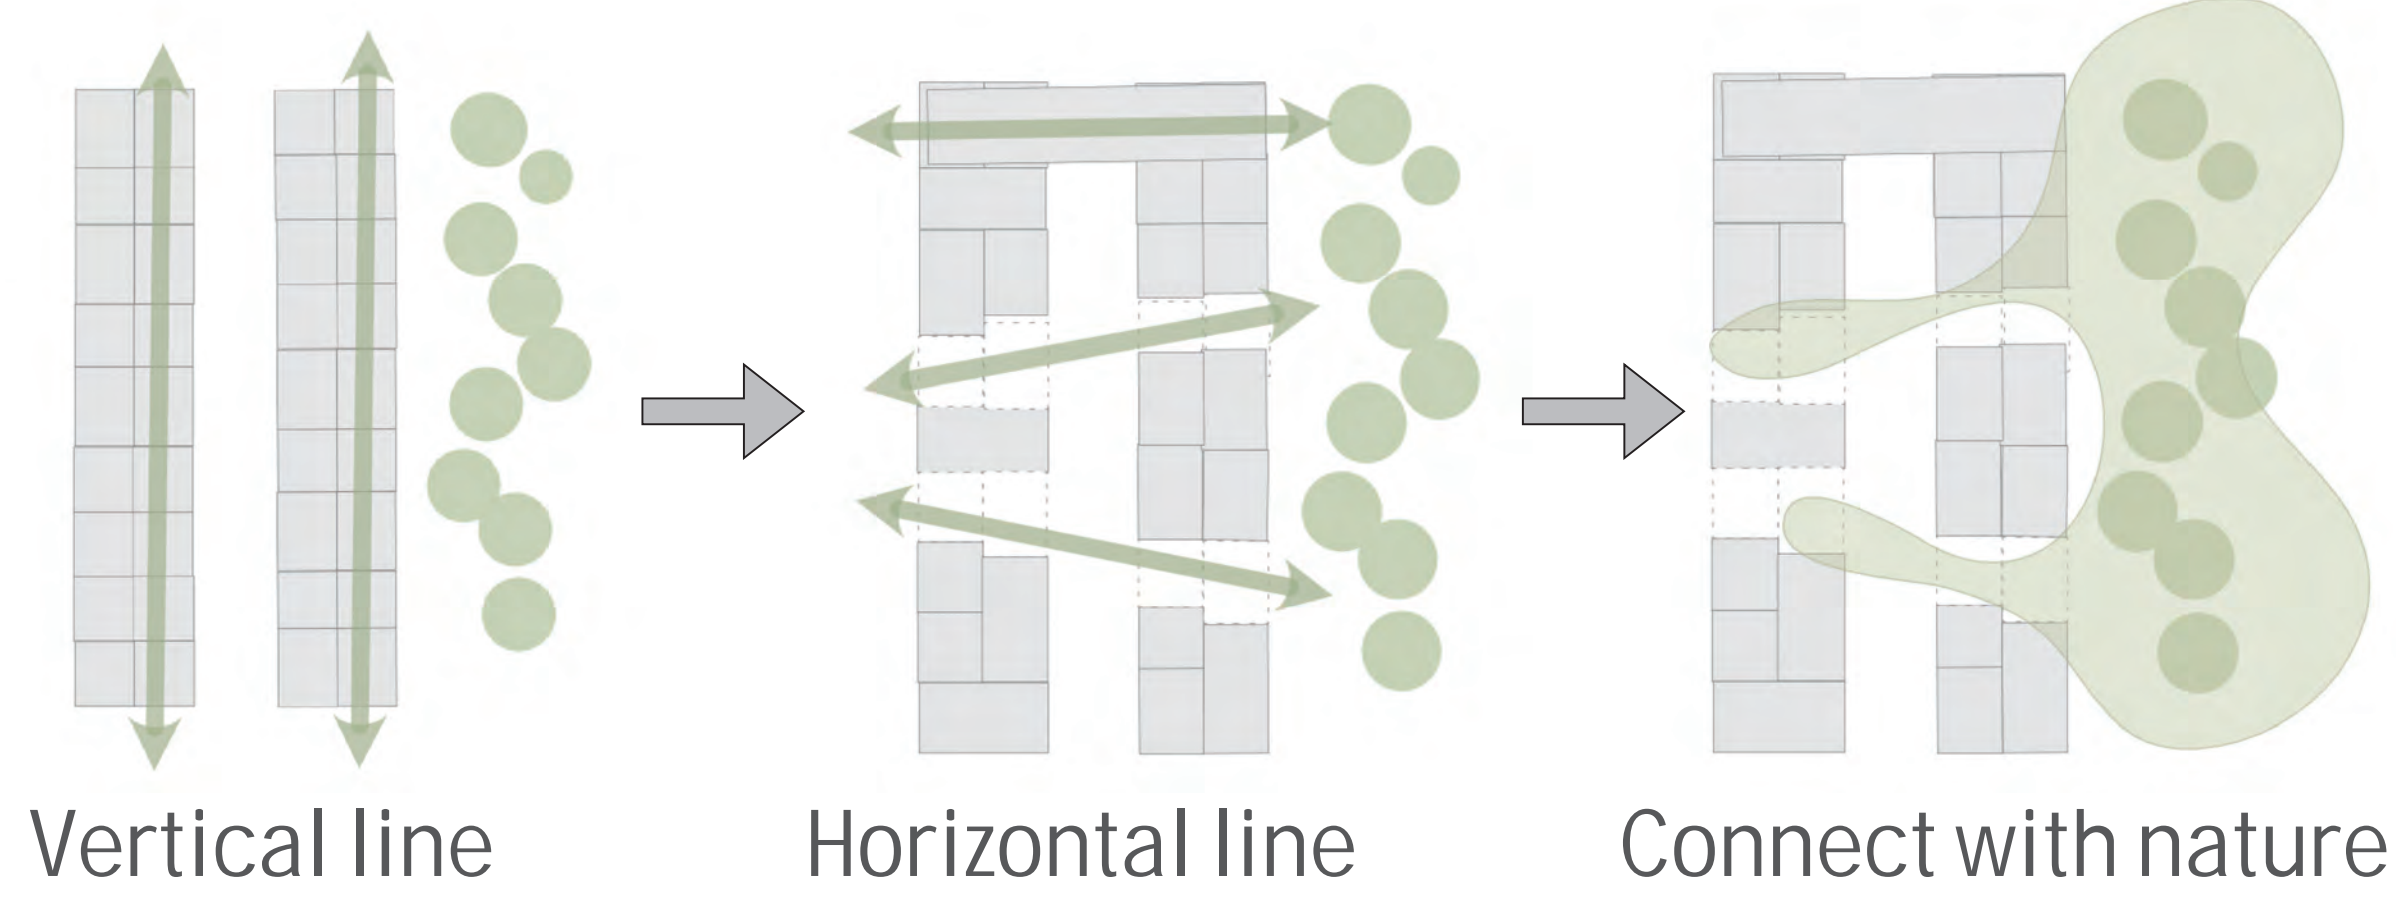

4. Facade design in keeping with the townscape

Apart from the connection of the town and new generation, we also try to take care about the feeling of the original residents. Although the facade is redesigned and changed a lot, we use the same materials as some part of the old street to create a nostalgic vibe in our design for them. And for the new comers in this town, they could enjoy the new design as well as the charm of old Valledolmo.
