

# 01 Who will be in the competition?

Ramsau, though a modestly-sized ski resort, serves as a global meeting point, welcoming individuals from around the world. The fresh air and pristine slopes provide the perfect backdrop for athletes and spectators to fully enjoy the thrill of ski jumping. Ramsau embodies inclusiveness and community spirit, demonstrating that a love for sport, nature, and life itself is a common bond among humanity.

Ski jumping here isn't merely about competition; it's an opportunity to experience the joy of life and the beauty of nature, reminding us to cherish these precious moments. As the hub of this exhilarating sport, Ramsau invites everyone—regardless of background or skill level—to participate in or witness this spectacular event.

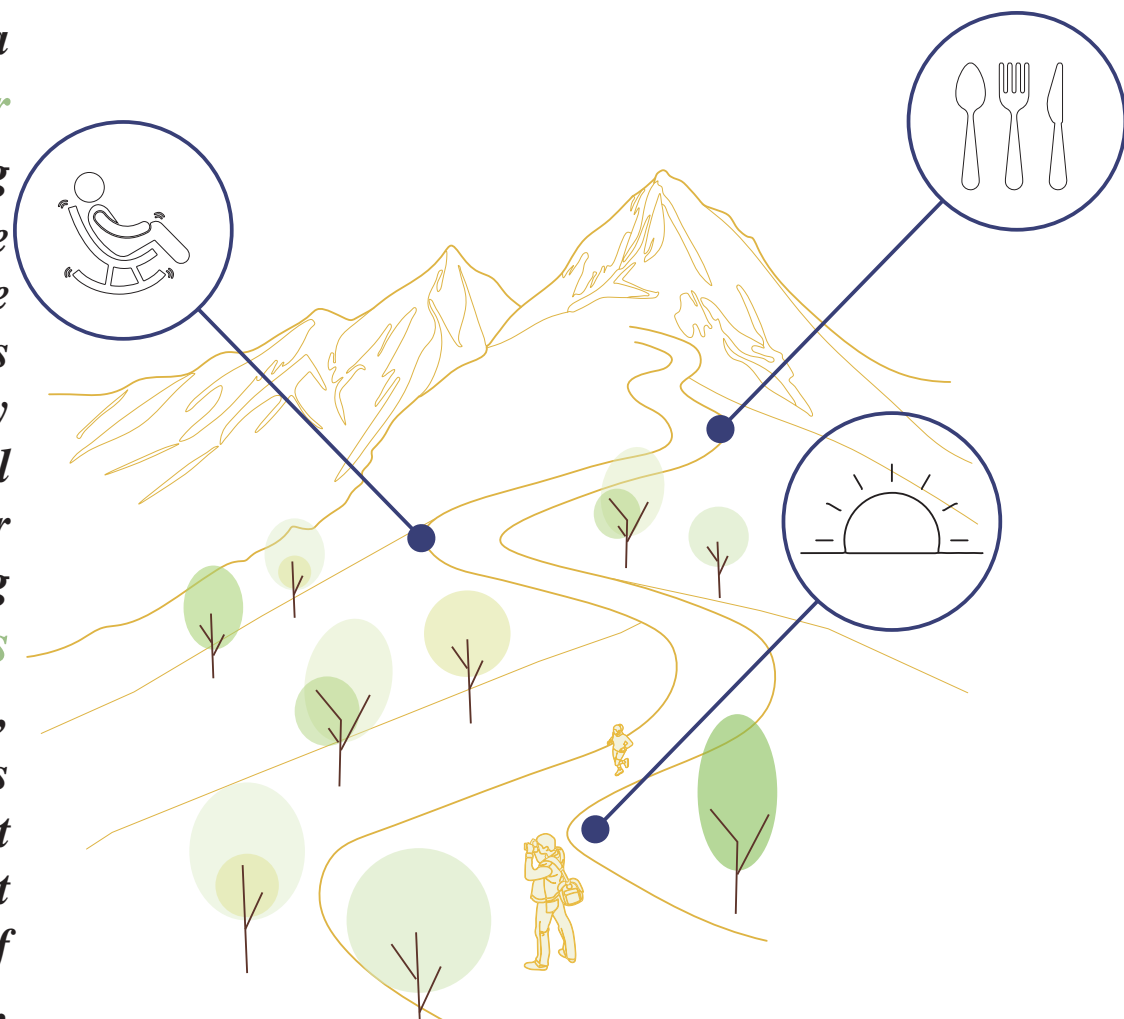

More than just a sporting event, it's a celebration of human spirit and physical endeavor, calling on everyone to enhance life, sports, and the natural world with an open and enthusiastic spirit.

Roofed hill that appears as an extension of the road

# 02 Wisdom comes from experien

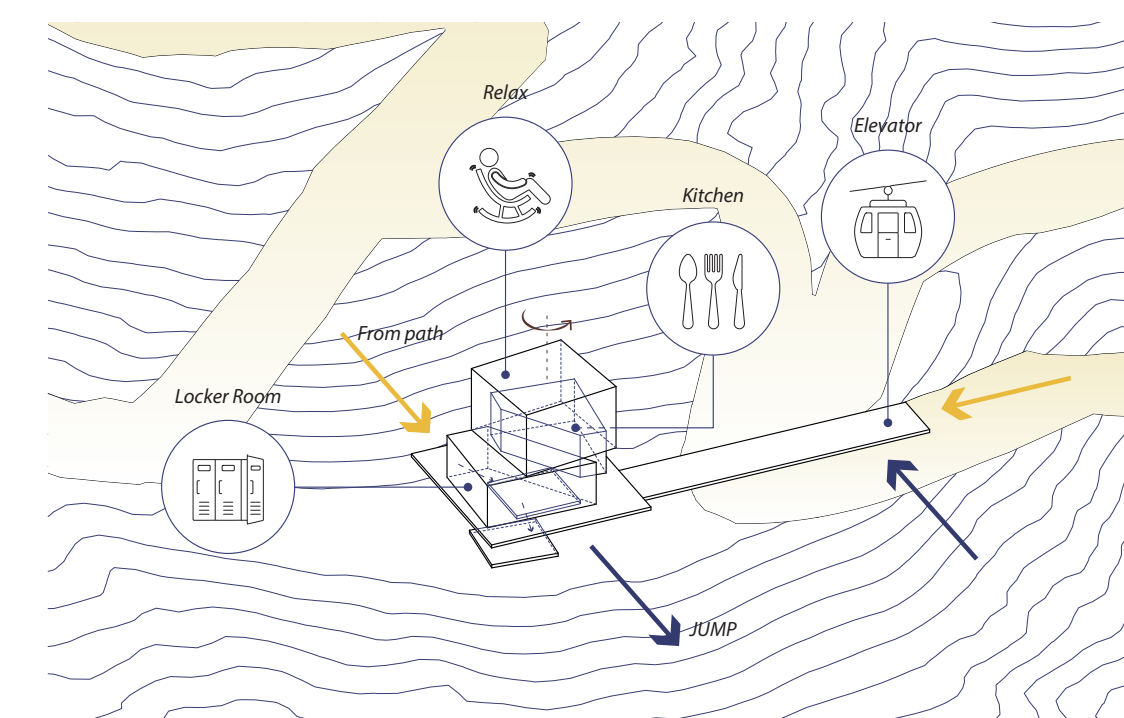

Roads are not merely pathways to a destination; they are avenues for experiencing life. Walking along winding nature trails allows us to relax, escape the city's hustle and bustle, and deeply appreciate the beauty of natural architecture. This proximity to nature enriches our sensory world, offering spiritual solace and mental tranquility within its embrace. As stages for exploring the unknown and experiencing new things, every step on these roads mirrors our personal life journeys, guiding us towards deeper self-awareness and life's true essence. Such journeys are not just explorations of the external world but profound dialogues with—and awakenings of our inner selves. With each step taken, we more profoundly understand and contemplate the meaning of life. We insert the experience of such a path into our architecture.

# 03 Projects--Staring Box

## Complex&Dimensional eave lines

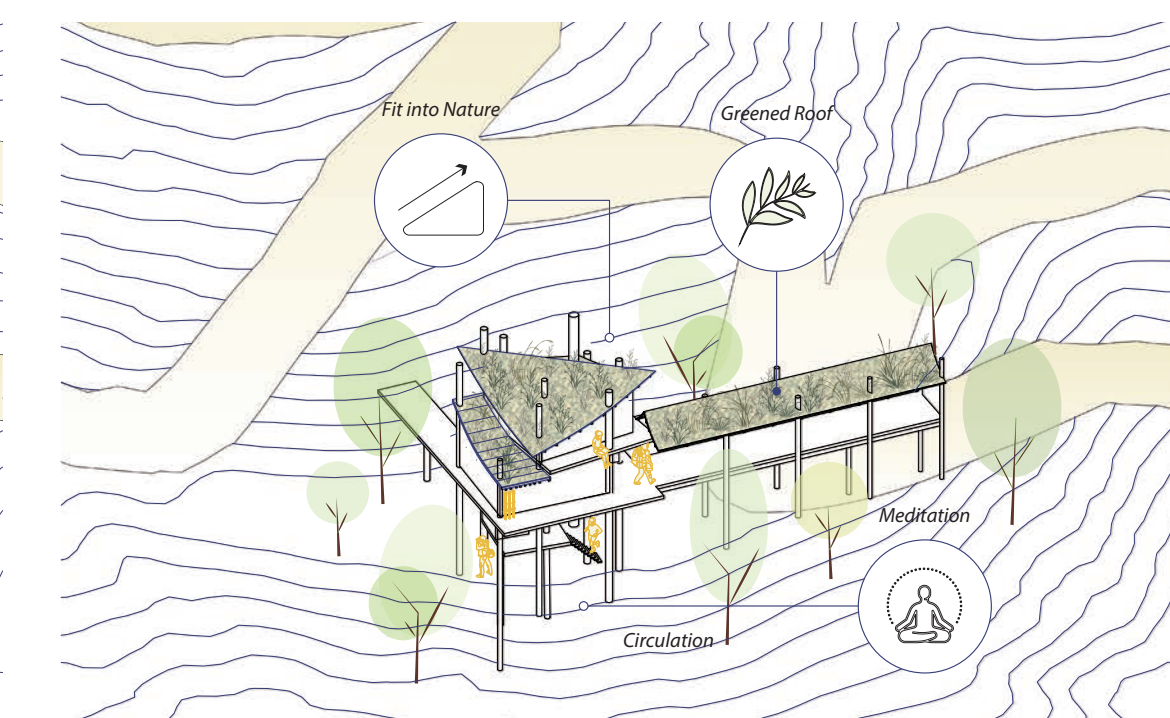

Adjust the angle of the volume to the mountain range to create a void. Complex, dimensional eave lines enhance both aesthetics and functionality. They efficiently manage rainwater runoff, protecting the building's facade and foundation, while providing improved shading. This helps reduce energy consumption by minimizing heat gain. The design approach adds a unique visual appeal to the building. Moreover, this type of roof construction conforms to the natural contours of the mountain.

## Bark-covered log columns

Insert a row of random columns as if you were in a forest. It includes effective utilization of space and light, improved air circulation, and enhanced visual depth and dynamism. By creating open spaces, it fosters better interpersonal interaction and flow. This approach not only enhances the functionality and comfort of the building but also increases its aesthetic value, making it a unique focal point of both visual and experiential interest.

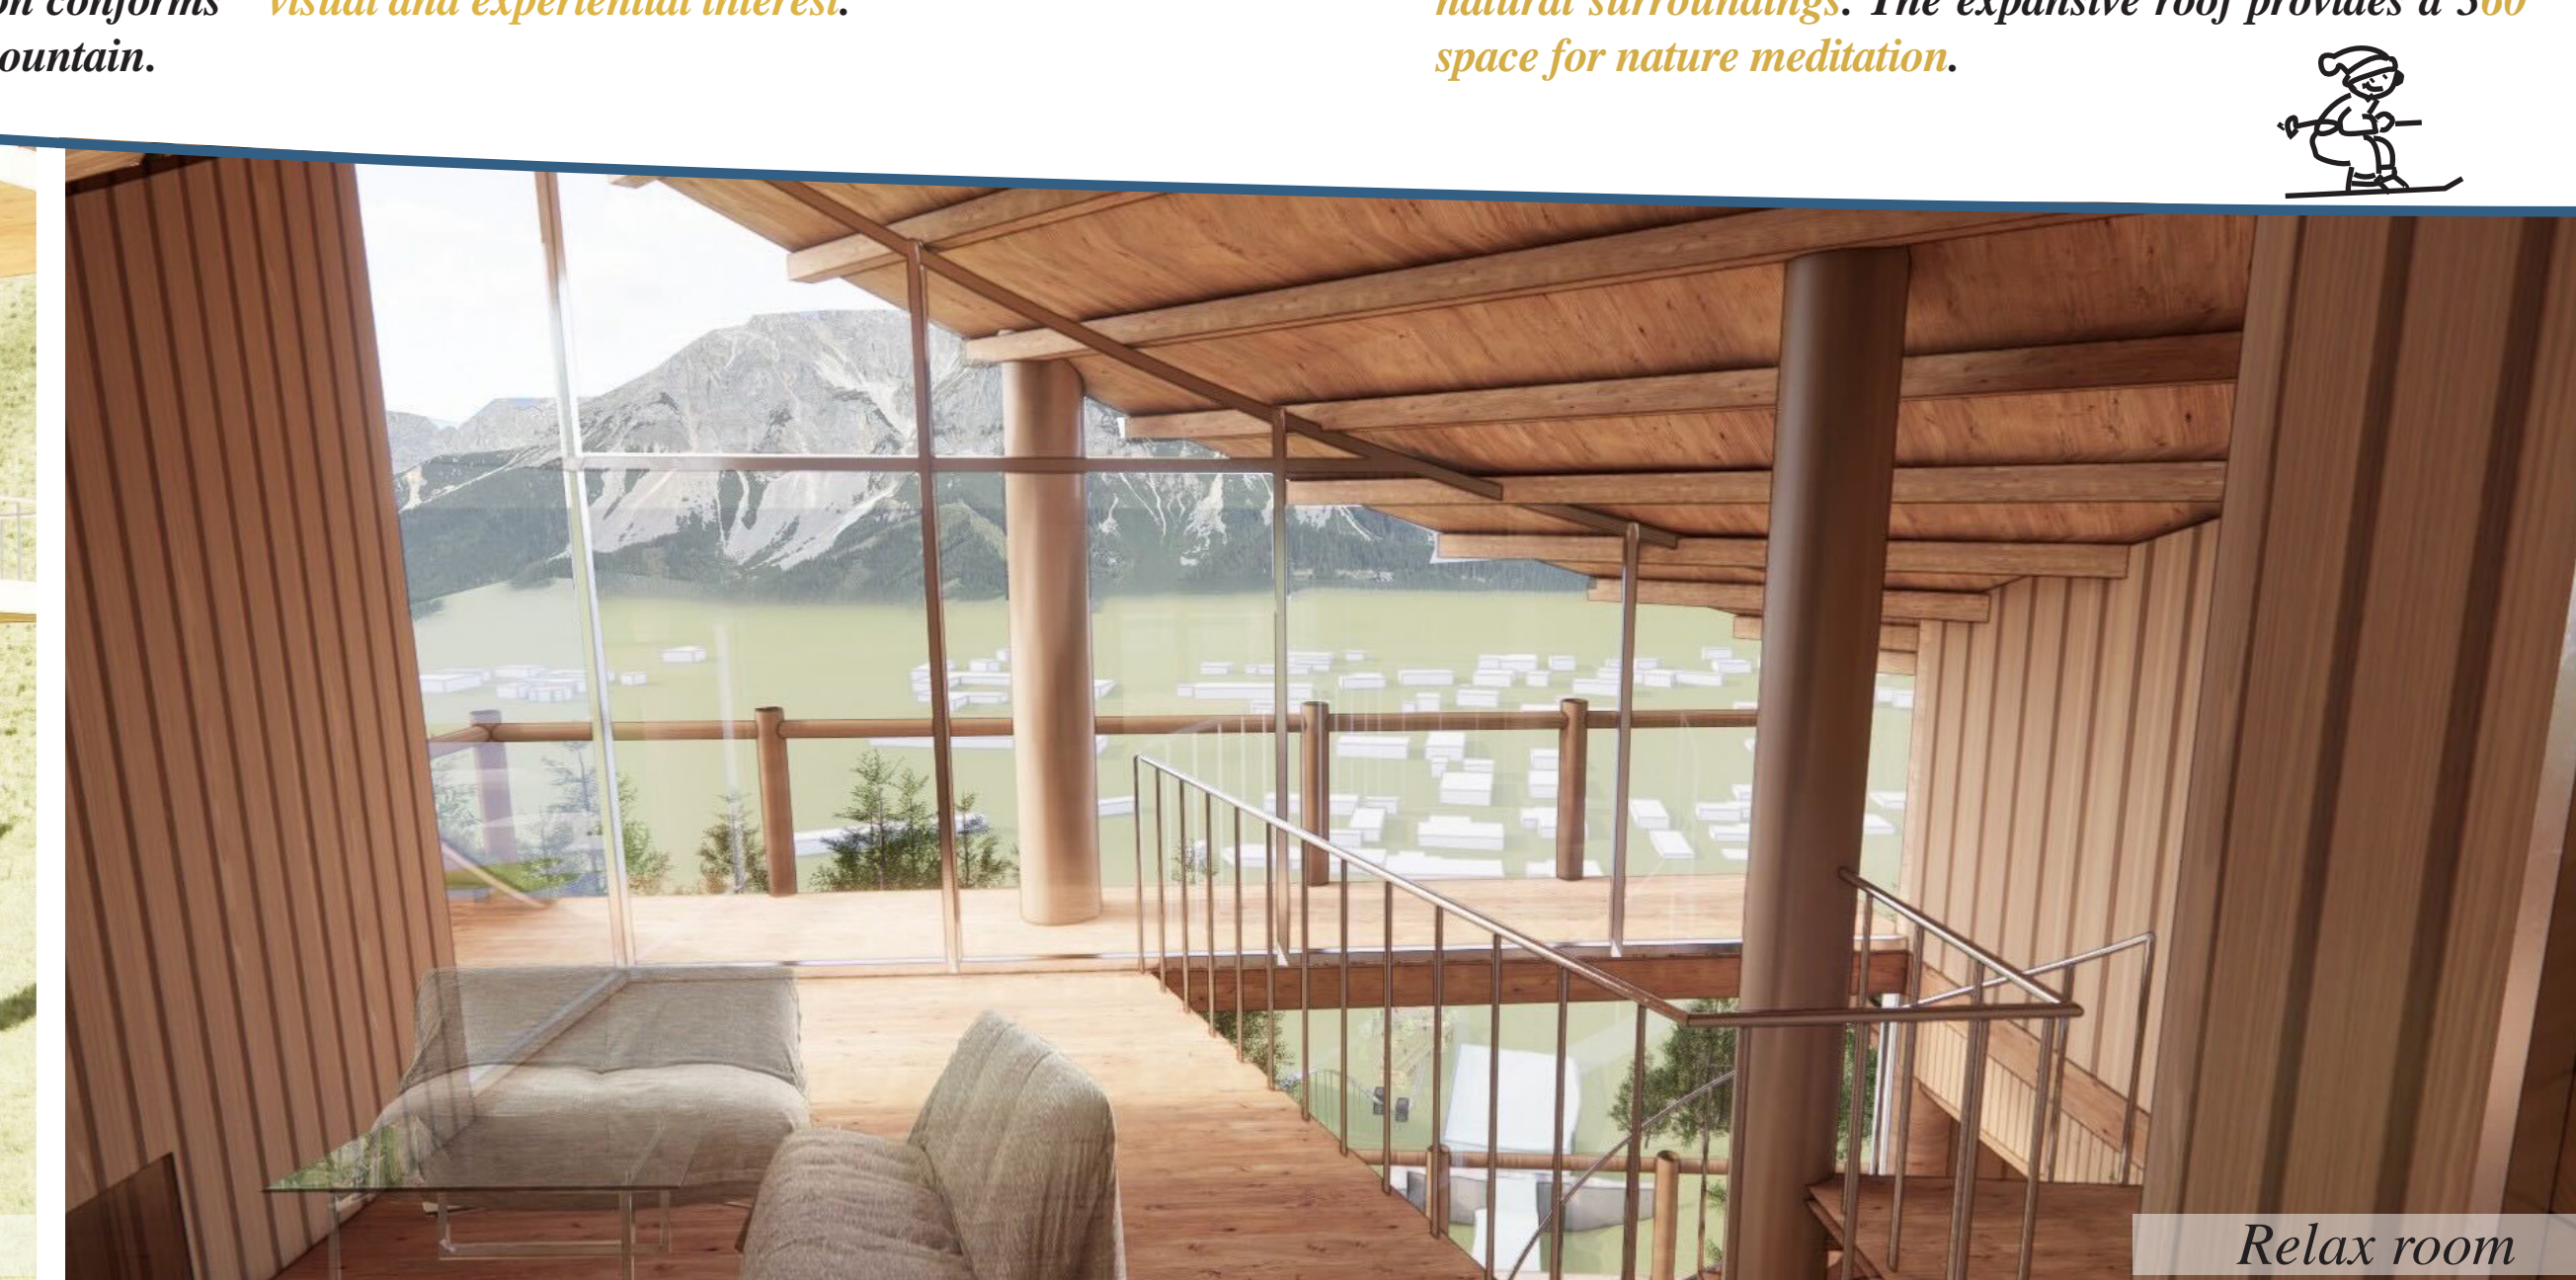

## Living roof

This type of roof involves laying a layer of soil and planting green vegetation on top. It not only provides excellent insulation and moisture retention but also reduces rainwater runoff. Additionally, green roofs help increase biodiversity and support urban ecological systems. These roofs are not just functional; they add a unique aesthetic to buildings, blending them more harmoniously with their natural surroundings. The expansive roof provides a 360° space for nature meditation.

Ecosystems, roofs that blend in with the environment

## 05 Regacy

After the convention, new activities will be created at this facility.

Sauna: Dive into the piled snow to get in refreshed.

Form  
The form of the building traces the slope of the mountain base. This design provides structural benefits, such as efficient use of space and light, improved air circulation, and increased visual depth and dynamism of the interior, contributing to improved housing and usability. In addition to its visual appeal, it is also a practical design that efficiently keeps rainwater and snow out. It can create a spacious interior space ideal as an attic.

Planting experience: manage a vegetable garden to grow plants and nurture a forest in the Audience facility.

Restaurant: Enjoy the traditional cuisine of Ramsau with a spectacular view.

# 04 Projects Audience

This building is thoughtfully designed to include a spectator area, lounge, ski lift entrance, and changing rooms. Each space is carefully crafted to provide a comfortable and convenient experience, ensuring visitors can fully enjoy their skiing adventure while having access to excellent rest areas and amenities.
